Candidate Statement

Since the earliest days of my nursing career, APHON has provided me with a community of colleagues, experts, mentors, collaborators, and dear friends. APHON is where I come for inspiration and for solace. APHON provides us with access to the brightest minds and the best evidence, as we work together to find the cure for all children, adolescents, and young adults with cancer and serious blood disorders. When times are difficult and a cure isn't possible, APHON teaches us to lean on each other as we walk through the pain. It teaches us to hold on to hope as we prepare to fight for the next patient and family. As Director at Large, I aim to serve the APHON nursing community to help further our shared mission and vision and to give back to the professional community who has given so much to me. In collaboration with the Board of Directors, I am committed to providing the structure, resources, and support required to maximize the benefit to our members and our patients. We do this through leveraging the strengths of our brilliant and diverse nursing community. Every nurse, from the newly graduated to the seasoned mentor, has an essential role in our mission and a home in our organization. Collectively, we will continue to optimize patient outcomes through achieving the highest standards of nursing care. It would be an honor to serve each of you and our community as we advance nursing care for our patients and their families.
